4 2. What is Machine Learning? “Optimizing a performance criterion using example data and past experience”, said by E. Alpaydin [8], gives an easy but faithful ...

### Machine Learning Tutorial -

Data mining (Data Mining) is the process of extracting useful information from large data sets. It involves the use of statistical and machine learning techniques to analyze data and identify patterns. Data mining is used in a wide range of applications, including marketing, finance, and healthcare.
